

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

March 1-15, 2005

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **March 1-15, 2005**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Associate Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

<u>Documents Received on Tuesday, March 01, 2005</u>			
2005032002	Parcel Map Application No. 2005-07 - Anthony Borba Et Al. Stanislaus County --Stanislaus Request to split a parcel of 1,374.32 acres, zoned A-2-40 (General Agriculture) into parcels of 253.32, 176.23, 304.27, 250.78, 152.14, and 237.58 acres. Property is subject to a Williamson Act contract and an overflow easement for the Farmington Dam and Reservoir. This property is located behind the Farmington Flood Control Dam and is not within any fire service area.	CON	03/21/2005
2001062107	Alameda Point Golf Course Alameda, City of Oakland, Alameda--Alameda The project is an 18-hole links-style golf course, hotel/clubhouse and public open space with associated facility plus a nine-hole short course, on approximately 215 acres of Alameda Point. The project would provide public access on the shoreline via public park operated by the City of Alameda and an extension of the San Francisco Bay Trail. The site contains portions of the abandoned NAS Alameda airfield, guard tower, and several mall structures, all of which would be demolished. The site would be contoured using dredge materials, which would be dewatered and stockpiled on the site prior to the project construction.	EIR	04/14/2005
2002022045	The Residences and The Retreat at Rancho Murieta Sacramento County --Sacramento Two projects on multiple discontinuous parcels to construct residential subdivisions on currently vacant land in a gated community.	NOP	03/30/2005
2002121038	Water System Master Plan Update Solvang, City of --Santa Barbara The City prepared the Water System Master Plan Update. The Update and the capital improvement projects recommended by the Update are the primary subject of the Environmental Impact Report that the City intends to prepare. The Update presents a capital improvement program to address future water demand, treatment, storage, and distribution needs.	NOP	03/30/2005
2005031003	Woodfin Suites Hotel & Port Master Plan Amendment San Diego Unified Port District San Diego--San Diego The proposed project involves the redevelopment of an existing marina and closed restaurant currently leased to Marina Cortez, Inc. The project site is located at 1880 Harbor Island Drive in San Diego within the West Harbor Island Subarea of Planning District 2 in the Port Master Plan. A subtenant, Woodfin Suite Hotels, LLC, will undertake the proposed redevelopment. The proposed project includes demolition of all existing structures on the 3.8-acre tidelands property and complete removal of the existing fuel dock. The proposed components of the project include: a) Construction of a six-story, 100-suite hotel with a restaurant and bar over partially suppressed parking; b) Construction of a new and separate marina services building, including a mezzanine; c) Construction of a 1,120-lineal foot seawall along the entire shoreline frontage of the marina. The seawall will be constructed atop a newly developed public promenade; d) Development of 401 on-site parking spaces. An alternative scenario of the project in which twenty of the	NOP	03/30/2005

2004091163	2005 San Benito County Regional Transportation Plan Update San Benito County Governments Hollister, San Juan Bautista--San Benito The 2005 San Benito County Regional Transportation Plan (RTP) is an update of the region's existing 2001 RTP. The RTP is a state-mandated, long-range plan which is intended to provide a vision of regional transportation goals, policies, objectives and strategies, providing a basis for transportation infrastructure and operation / maintenance decisions for both the short and longer (25-year) term. The RTP identifies the region's transportation needs, sets forth an action plan of projects, determines actions and programs to address the needs and issues, and documents the financial resources needed to implement the Plan. The RTP establishes a clear vision of San Benito County's regional transportation goals, policies, objectives, and strategies. The Action Element of the RTP includes all the major transportation projects within the county being considered by various agencies. Such projects may include intersection improvements, highway and roadway widening, bicycle lanes and paths, pedestrian-related projects, transit-oriented projects, and other infrastructure related to transportation activities. 2004121153	Airfield Drainage Improvements at Santa Barbara Airport Santa Barbara, City of Santa Barbara--Santa Barbara The proposed project would improve drainage capacity to the Santa Barbara Airport airfield from 20 cfs to 49 cfs, which would in turn enhance safety for aircraft operations. The project would be constructed during the period of May 1, 2005 to September 1, 2005. Construction activities would include pipe removal and installation, storm drain outlet construction, dewatering, and temporary disturbance to approximately 139,705 sf of Airport Property - of which 4,644 sf would be Coastal Act wetlands and 900 sf would be U.S. Army Corps of Engineers wetlands. The existing storm drains are located about 24 to 60 inches below ground. The replacement pipes would be located at similar depths. The disturbed areas of the airfield would be allowed to revegetate through natural colonization by reseeding, depending on the location of disturbance. In addition, the project includes a 6:1 wetland restoration component for permanent impacts to 40 sf Coastal Commission and Army Corps wetlands.	NOD	
2004122057	Noel Residence Grading Permit (DGP 3270) Placer County Planning Department Auburn--Placer Project consists of the alteration of the property via grading, which results in the removal/clearing of vegetation, including the removal of two Cottonwood trees along the wetland swale.	NOD

	guidelines. Archaeological resources that were stored in the building will be recovered, recorded and stored in collection. Some subsurface excavation will be required in previously disturbed areas. The project includes landscaping and other amenities.		
2005038003	CP 04-07 Browne Condo Carlsbad, City of Carlsbad--San Diego Condominium Permit for the conversion of an existing town home into two airspace condominiums.	NOE	
2005038007	Borrego Palm Canyon Trail Rehabilitation (04/05-CD-20) Parks and Recreation, Department of --San Diego The purpose of this project is to rehabilitate/repair Borrego Palm Canyon Trail, a Class I trail destroyed by flash flooding in September 2004. This trail is 1.5 miles long extending from Borrego Palm Canyon campground up the canyon to a grove of native fan palms. Habitat in the area is a broad alluvial fan, shifting seasonal streambed, and typical Colorado Desert vegetation. The federally-endangered Peninsular Bighorn Sheep frequents the canyon area. Rehabilitating the trail will involve cutting through or relocating downed fan palm trunks deposited during the flood, creating steps at certain locations using native rock, crossing the stream at 3 locations, removing debris from the trail, and replacement of interpretive signs along a portion of the trail. In addition, several small barricades will be constructed out of downed palm trees at the native palm grove to restrict public access and allow for palm grove recovery. Portions of the old trail will be incorporated into the new trail wherever possible. A State Parks archaeologist will be present during trail repair activities in locations with known archaeological sites to ensure the avoidance of impacts to cultural resources. No trail repair activities will occur between June 1 and October 1 to minimize potential disturbance to bighorn sheep. This project is related to a previous project involving emergency trail clean-up for public safety.	NOE	
2005038008	Sandspit Water Monitoring Parks and Recreation, Department of --San Luis Obispo Locate and test water monitoring wells located on the Montaña de Oro State Park sandspit. Purge wells of approximately 100 gallons of brackish water at a rate of three gallons per minute prior to sampling. All equipment will be carried to the sites on foot; vehicular access onto the sandspit will be gained using DPR-identified access routes. To avoid effects to local populations of Dithyrea and archaeologically sensitive areas, work crew will be accompanied to the site by a DPR-qualified ecologist and archaeologist who will assist in determining access paths. Document wellhead locations using GPS technology to facilitate relocation in the future. The test will document salt water intrusion into the Morro Bay/Los Osos groundwater basin.	NOE	
2005038009	Temporary Authorization for Aerojet-General Corporation to Store 36 Containers of Hazardous Waste that will Exceed the One Year Storage Limit in the Facility Pe Toxic Substances Control, Department of Unincorporated--Sacramento The Temporary Authorization allows Aerojet to temporarily store explosive and propellant hazardous waste beyond the one year time period in the Hazardous Waste Facilities Permit. the hazard test and 3rd party procedures and are currently under evaluation by the DOT for the granting of hazard classifications for the purpose of shipment to an approved off-site hazardous waste treatment facility.

The 36 containers average approximately ten gallons in size. While the temporary authorization will allow storage of these wastes for up to 180 days, Aerojet has indicated that it desires to ship this material as soon as it is authorized and that some of the waste is likely to be shipped within a few weeks. Aerojet has also indicated that it is confident that it will be able to ship all of the waste within the allowed timeframe.

As a condition of the authorization, DTSC is requiring Aerojet to prepare an evaluation of the lead time needed to schedule authorizations for future shipment of similar wastes to assure that they can be stored and shipped within the limits of their existing permit.

2005038010	<p>Former Castrol Facility, Removal Action Workplan for Soils Toxic Substances Control, Environmental Protection Agency Los Angeles, City of--Los Angeles</p> <p>The proposed project consists of the removal of benzene impacted soil at Areas SG8/SG29 and SG7 through implementation of the Removal Action Workplan. Approximately 800 cy of benzene impacted soil will be excavated and shipped offsite as non-hazardous waste for thermal treatment at TPS Technologies, Inc. in Adelanto, California. The top five feet of soil will be removed from the impacted areas. The final cleanup goals for benzene, based on a cancer risk of 1×10^{-5} and industrial/commercial use standards, are 110 µg/L-vapor at 5 feet (bgs) and 129.5 µg/L-vapor at 15 feet bgs.</p>	NOE

2005032014	Housing Element Update Belvedere, City of Belvedere--Marin The project consists of an update of the City of Belvedere's Housing Element, which has been reviewed and approved by the State of California's Department of Housing and Community Development. The Housing Element Update includes provisions for providing the City of Belvedere's fair share of the regional housing need, which is a total of 10 units between January, 1999 and June, 2006, with the following income breakdown: 1 unit affordable to a very low income household (10 percent of the total); 1 unit affordable to a low income household (10 percent of the total); 2 units affordable to moderate income households (20 percent of the total); and 6 units affordable to above moderate income households (60 percent of the total). Belvedere is unique insofar as it is severely limited in developable land; it is essentially built out. Therefore, redevelopment is the most likely method of meeting the legal obligation to provide 10 units of affordable housing. In reviewing potential options, it appears that second units may provide the most likely way to meet the housing need, which is the plan that has been described, and is currently being implemented, in the Draft Housing Element, and is the plan that has been approved by the Department of Housing and Community Development. 	Plan provides policies and guidelines that help coordinate these independent projects and to facilitate the achievement of the shared vision and goals for the San Gabriel River corridor. In addition, the Master Plan identifies five Concept Design Studies that highlight how project planning can address multiple goals of the Master Plan.		
2004062040	One Rincon Hill Residential Development San Francisco Planning Department San Francisco--San Francisco The project involves the demolition of an existing, vacant Bank of America office building, clock tower, and parking garage and construction of a 720-unit residential condominium development in two towers and in townhouses, as well as retail use, parking garage, and open space. The project requires the following approvals: 1) rezoning and general Plan amendment (including a Height/Bulk and use district reclassification) should the proposed Rincon Hill Plan and Downtown Residential District not be adopted and/or proceed as scheduled; 2) Conditional Use authorization or design review should the proposed Rincon Hill Plan and Downtown Residential District be adopted and/or proceed as scheduled; 3) compliance with Planning Code Section 315, the Residential inclusionary Affordable Programs; 4) demolition permit and building permit from the Department of Building Inspection; 5) a revocable encroachment permit or street improvement permit from the Department of Public Works and approval from Dept. of Public Work and the Dept. of Parking and Traffic for street improvements; and 6) approval from Dept. of Public Work and in coordination with Caltrans for use of the 1st Street right-of-way. The project sponsor proposes a merger of the site's three lots, approvable by Dept. of Public Works.	EIR	04/18/2005
2005011013	Central Los Angeles High School #12 Los Angeles Unified School District Los Angeles, City of--Los Angeles The proposed Central Los Angeles High School #12 would provide 19 classrooms and 500 two-semester seats for grades 9 through 12. School facilities would include a library, multi-purpose room and student lockers, cafeteria, and administration facilities. A parking structure with 47 parking spaces would be constructed under the main school building. The proposed small learning community would be co-located with the already- approved 18.2-acre High School #10, currently under construction and located on the adjacent west property line; the two high schools would share athletic fields.	FIN	
2000091089	Draft - Addendum to Adopted MND Amending Section 604.1 of California Plumbing Code Housing and Community Development, Department of -- Pursuant to a public petition, the Department is proposing to amend section 604.1 of the California Plumbing Code to remove the requirement that, prior to the installation of CPVC water pipe inside residential structures, a local building official must make a finding that there is or will be a premature failure of metallic pipe if installed in the structure (the "Findings Requirement"). The proposal to remove the Findings Requirement constitutes a change to the project that was evaluated in the MND, which necessitates a subsequent environmental document under CEQA. No other changes are proposed.	MND	04/12/2005

2005031015	<p>Centex at Golden Valley Road Santa Clarita, City of --Los Angeles</p> <p>The applicant is proposing the construction of a 167 unit, single-family condominium residential development on three sites that total 33-acres. In order to comply with the land use requirements of the General Plan and Unified Development Code (UCDO, a general plan amendment and zone change is required to change the land use from the existing Commercial Neighborhood designation to the Residential Moderate High zone. The project includes a hillside review to allow for the grading on a hillside with an average cross slope that exceeds 10%, and to move approximately 50,000 cubic yards of earth on the project site (no import or export of earth is proposed). The project further requires a conditional use permit because there is a PD (Planned Development) Overlay on the site.</p>	MND	04/04/2005
2005031018	<p>Santa Fe Courtyards Placentia, City of Placentia--Orange</p> <p>The proposed project consists of two phases. Phase I of the proposed project includes the removal of the existing two warehouses and public parking (approximately 35 spaces), relocating existing utilities, and the construction of 51 single-family duplex units and a 14 to 16 foot high sound attenuation wall north of the BNSF railroad. Phase II of includes the addition of three live-work units off Bradford Avenue and four parking spaces to be utilized by the offices of the live-work units.</p>	MND	04/04/2005
2005032023	<p>Nathanson Creek Retaining Wall Project Sonoma, City of Sonoma--Sonoma</p> <p>The project is construction of a new 60-foot long by 4-foot high cast-in-place concrete wall designed to protect the Nathanson Creek Retaining Wall from further undercutting and erosion by Nathanson Creek. The proposed concrete wall will be covered with a basalt cobble veneer to match the appearance of the existing wall behind it. Approximately one foot of the cement wall will be buried below grade and the remaining three feet will be constructed above grade. The work will be accomplished by hand and no excavator or other heavy equipment will be utilized.</p>	MND	04/04/2005
2004091040	<p>State Route 79 Realignment Project from Domenigoni Parkway to Gilman Springs Road Caltrans #8 Hemet, San Jacinto--Riverside</p> <p>The Riverside County Transportation Commission (RCTC), in cooperation with District 8 of the California Department of Transportation, the Federal Highway Administration (FHWA), the County of Riverside, the City of San Jacinto, and the City of Hemet, will prepare a joint Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the realignment of State Route (SR) 79 (Project) in the vicinity of the cities of Hemet and San Jacinto in Riverside County, California. The realignment is proposed to occur 2 km south of Domenigoni Parkway to Gilman Springs Road.</p> <p>A range of alignment alternatives will be analyzed in the EIS/EIR. Alignment alternatives in the western, central, and eastern portions of the project area were identified through an alternatives analysis process described in detail in the Project Criteria and Alternatives Selection for Preliminary Agreement (June 22, 2004); and these alignment alternatives will be analyzed.</p>	NOP	04/04/2005

2005031014	<p>Mixed Use Solana Beach Train Station Solana Beach, City of Solana Beach--San Diego</p> <p>The proposed project is an integrated transit-oriented project that involves a mixed-use development consisting of increased parking provision for the Solana Beach Train Station, a visitor's center, office and retail space, a new theater building for the North Coast Repertory Theater (NCRT), 141 residential units including 14 affordable housing units, and 13 live/work units over retail. A landscaping plan is proposed for the entire development that is in keeping with existing landscaping to the west and south of the project site. The proposed project would be completed in two phases. Phase I would consist of the North County Transit District's (NCTD) parking facility construction and Phase II would involve the remaining project components. The project phasing is designed to minimize disruption to existing parking facilities for the Solana Beach Train Station. As an additional component, excavated material from both the NCTD parking facility (Phase I) and parking facilities below Building A and the residential units (Phase II), are proposed for use as beach nourishment for the City's beaches.</p>	NOP	04/04/2005
2005032024	<p>900 Minnesota Street - Case No. 2004-0027E San Francisco Planning Department San Francisco--San Francisco</p> <p>The proposed project is located at the street addresses of 900,910-12 Minnesota Street and 833 Indiana Street, between 20th and 22nd Streets. The approximately two-acre project site is occupied by six buildings totaling about 144,000 square feet. The existing buildings together make up the C. Schilling & Co. Wine Cellars (Schilling Wine Cellars) complex, which is a contributor to San Francisco's Dogpatch Historic District. Most recently, the site was used as an office, design and distribution facility for Esprit de Corp clothing company. The proposed project would provide 142 residential units, approximately 8,450 gross square feet (gsf) of non-residential space, including residential amenities such as a gym and storage space, approximately 6,900 gsf of office space, and 162 parking spaces in an underground parking area. About 27,000 gsf of on-site open space would be provided, including about 16,500 gsf of new on-site open space.</p>	NOP	04/04/2005
2005032026	<p>De la Salle University and Community Specific Plan Placer County Planning Department Roseville--Placer</p> <p>A mixed-use community, with two primary components: the 600-acre De La Salle University/Campus and the adjoining 536-acre Community. The campus includes 750 units of student housing, 330 low-density residential units for faculty and staff housing, 75 retirement housing units, 181.5 acres of open space and 363.5 acres for university uses. The Community includes 3,232 residential units, 45 acres of retail/office and public facilities, a school, parks and open space.</p>	NOP	04/04/2005

Rucker, representing Vallecitos Water District. The applicant proposes to alter the streambed, an unnamed drainage, tributary to Agua Hedionda Creek, tributary to the Agua Hedionda Lagoon, tributary to the Pacific Ocean, to accommodate the construction of the Land Outfall Interceptor Sewer Project. The project includes the replacement of 6,100 linear feet of sewer pipeline by constructing a new pipeline parallel to the existing pipeline. The pipeline will be 24"-36" diameter polyvinyl chloride (PVC) or high-density polyethylene using open-trench installation. Construction activity includes excavation and grading using excavators, backhoes, and trucks. The pipeline will cross the streambed at four locations impacting 0.06 acre of streambed.	NOD

2004051051	252 Corridor Park Phase 1 San Diego, City of --San Diego 252 Corridor Park Phase 1 / City Council Approval authorizing the City Manager to execute a construction contract with Heffler Company, Inc. for the construction of CIP No. 29-458.0, which includes the construction of a play area, comfort station, fitness course and other amenities.	NOD	
2004061026	StoneRidge Specific Plan Desert Hot Springs, City of Desert Hot Springs--Riverside The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0207-R6 pursuant to Section 1602 of the Fish and Game Code to the project applicant, First West Capital. The proposed project consists of the construction of 2,120 residential units on a 604-acre site. Grading within the unnamed wash on site has been avoided; however to provide access between the eastern and western portion of the development, two crossings are proposed to be constructed. These crossings will form portions of the planned Northern Spine Road and the Southern Spine Road, which cross the property in east-west alignments. The project will also include the widening of two existing roads that intersect the unnamed drainage onsite. These are Worsley Road, which forms the northwest boundary of the property, and West Pierson Blvd., which forms the southern boundary line of the property. The new road crossings will consist of a base course, a compacted subgrade and road cover. Culverts will be placed to avoid any impedance to flow in the drainage. Sidewalks will also be placed on both sides of the crossing to facilitate pedestrian traffic. The project will impact 0.11 acres of streambed. The impacts will be mitigated at a 2:1 ratio onsite.	NOD	
2004072068	Globe Mills Adaptive Reuse Project Housing and Community Development, Department of Sacramento--Sacramento Alternative M is the adaptive reuse of the historic Globe Mills into a mixed-use residential complex. Certain structures in the mills complex would be rehabilitated, some demolished, and two new buildings constructed on the site for a total of 145 residential units and 3,000 sf of retail and commercial over parking. There would be up to 31 market rate residential units in the rehabilitated Mills Structure, 72 senior housing units in New Building 1 and 42 senior housing units in New Building 2.	NOD

2005038087	Stream Bank Retaining Wall Fish & Game #3 Healdsburg--Sonoma Protection of an eroding section of stream bank adjacent to a winery building on an unnamed tributary to Franz Creek. The project involves constructing approximately 40 feet of retaining wall consisting of up to 5 steel pipes buried approximately 4 feet into the stream bank above the level of Ordinary High Water and connected with wood lagging placed to a height of about three feet above ground level. SAA 1600-2005-0011-3.	NOE	
2005038088	Millerton Area Watershed Action Plan Sierra Foothill Conservancy --Madera, Fresno This project will conduct an in-depth study and analysis of the Millerton Area Watershed south of North Fork with the end result to be a management plan that will identify stressors and other barriers to watershed health and outline an action plan and timetable for implementation of projects that will improve water quality, quantity, and terrestrial and aquatic habitat protection. The Millerton Area Watershed Coalition is already working on a management plan for the Upper Finegold Creek Watershed. The completion of the Millerton Area Watershed Action plan will complete the planning process for the entire watershed and will benefit the community by improving the environmental quality of the area. This is one of the quality of life factors that will contribute to their economic re-growth. It is also expected to lead to the identification of a wide variety of restoration and control projects that can be implemented using local contractors. And finally, it will also contribute to fuels management to avoid fires such as the one experienced in 2001, which stripped hundreds of acres of land leaving it subject to excessive erosion.	NOE

2005038093	Native Tree Planting and Maintenance at Brannan Island - State Recreation Area Parks and Recreation, Department of --Sacramento Plant 1100 Coast Live Oak and Sycamore trees at Brannan Island SRA. The trees are native species and seedlings have been grown from acorns and seeds collected in the intermediate vicinity of the park unit. Trees of the "15 gallon" size will be planted in holes no less than 18 inches deep by 30 inches wide. Seedlings may be planted in smaller holes which provide sufficient growing room. All trees will be double staked. The trees will be maintained for three years. Temporary irrigation will be installed as needed to water the trees. HART Inc. is completing this work under a contract with the Sacramento Tree Foundation. The District Resource Ecologist will review the planting locations prior to ground disturbance. Tree planting will not be conducted in areas at Brannan Island SRA which are used by Burrowing Owls. No cultural resources are present in the project area.	NOE	
2005038094	Bodie Building Stabilization Phase Four Parks and Recreation, Department of --Mono Stabilize the following historic buildings at Bodie State Historic Park to protect the buildings from further deterioration: - Bell Assay Office - PT perimeter foundation, re-roof, repair or replace exterior siding and roof sheathing as needed, repair or replace rotted and broken rafters, repair interior walls, re-glaze and secure windows. - Reddy Residence, Storage - PT perimeter foundation repair or replace rotted and broken rafters, repair roof, repair or replace siding, secure windows. All salvageable fabric will be retained. Scarf joints and stitch plates will be used if necessary to retain those portions of rafters and joists that are not rotten. All new wood will be marked in a way that is absolutely permanent. All work will be photodocumented and organized in unit history files. Archaeological monitoring and sample screening of spoils will be done during project implementation. Ground disturbing work will be suspended if potentially significant archaeological resources are exposed and/or adversely affected by the proposed action. Proposed project work will resume after a proper archaeological data program has been designed and implemented. Cultural Resource Management activities will be conducted by or under the supervision of a California Department of Parks and Recreation qualified archaeologist.	NOE

NOD	
2002112106	Coastal Trails Rehabilitation Project Parks and Recreation, Department of --Marin The Department of Parks and Recreation proposes to make the improvements described herein to the Lone Tree and Coastal Fire Roads in the Mount Tamalpais State Park. - Convert one-half mile of existing road to trail by narrowing the road surface. Three-tenths of a mile of Coastal Fire Road and two-tenths of a mile of Lone Tree Road will be narrowed to trail. This portion of the project would involve the mechanical excavation of road embankment and landing fill, and stabilization of excavated materials on the inboard edge of the cutbench. A narrow portion of the road cutbench would be preserved to serve as the trail bed. - Construct new trail to replace the poorly aligned portions of the existing Coastal Fire Road that cannot be safely converted to trail, due to poor alignment, drainage problems, and/or erosion. Approximately 2.1 miles of trail would be realigned. - Decommission and re-contour 3.1 miles of poorly aligned sections of the fire roads (1.6 miles of Coastal Fire Road and 1.5 miles of Lone Tree Fire Road) to pre-disturbance topography by excavating embankment fill from the roads and stabilizing excavated material on the cutbench.' - Construct 0.2 mile of new Dipsea Trail where a current segment of this trail, that shares an alignment with the Lone Tree Fire Road, will be removed by the decommission of the Lone Tree Fire Road.	NOD	
2004062029	Gilroy Second High School Gilroy Unified School District --Santa Clara The proposed project is acquisition of 51 acre of land and construction of a second comprehensive high school. The first phase of the project is projected to be finished in 2009, and accommodate 900 students. The first phase includes construction of a library and multimedia facility with a computer lab, the main school gym, cafeteria and food service facilities, student support area, and classrooms to accommodate the 900 students. Phase I is anticipated to cost 39	NOD

<u>Documents Received on Tuesday, March 08, 2005</u>			
2005038089	Limekiln Main Gate Replacement Parks and Recreation, Department of --San Luis Obispo Replace failing main entrance gate to Limekiln State Park. Gate will be relocated approximately 25 feet closer to Highway One. The new gate will be fabricated out of heavy aluminum pipe in two sections and will be a typical park design. Work will be carried out by park staff. Project supports continued use and maintenance.	NOE	
2005038090	Marina Spit Trail Delineation Parks and Recreation, Department of --San Luis Obispo Install a fenceline along the eastern terminus of the State Park Marina parking area consisting of four foot high peeler-poles placed at ten foot intervals without wire. The fenceline will delineate trail access to the Marina Spit and prevent vehicular encroachment onto sensitive habitat.	NOE	
2005038091	Stabilize and Repave Hearst Castle Administration Road Parks and Recreation, Department of --San Luis Obispo Remove and repave approximately 8,000 sf of asphalt on the Hearst Castle Administration Road including approximately 500 feet of asphalt curbing. Construct a 100 by 16 feet to bedrock concrete retaining wall at the base of existing pilings located below the Grand Terrace to stabilize localized soil slumping along the road. Asphalt removal immediately adjacent the Grand Staircase will be monitored by a DPR-qualified archaeologist and/or restoration specialist and will be done in such a manner as to avoid damaging the bottom step and marble facing on the riser. Any marble that sustains damage or has been damaged by previous road work will be replaced in kind. A potentially historic stone feature adjacent the western edge of the project area, and a reasonable margin around it, will be fenced with orange "sensitive area" fencing for the duration of the project. No construction equipment will be permitted in the delimited area. A DPR-qualified archaeologist will monitor excavation for pilings and wall footings. Should any underground features be encountered, they will be avoided if possible and thoroughly documented.	NOE	
2005038092	William Randolph Hearst Memorial State Beach Bluff Fence Re-alignment Parks and Recreation, Department of --San Luis Obispo Re-align approximately 480' of the bluff boundary fence adjacent to the William Randolph Hearst Memorial State Beach day use area to compensate for bluff retreat. The galvanized chain-linked fence will be moved inland from five to 15 feet and will be replaced in-kind. In general, existing fence posts will be pulled up along the concrete in which they are set, using a backhoe. In areas defined by a DPR-qualified archaeologist in consultation with the project manager, the following techniques will be used. To minimize site disturbance, existing fence posts will be cut off at surface level, concrete in which they are set will be left in place, and replacement posts will be pounded or drilled into the ground. Project will improve public safety and reduce pedestrian damage to bluff edges.	NOE	
2005038095	Addition to the California State Police Officers Memorial General Services, Department of Sacramento--Sacramento The project consists of the construction of a small addition to the existing Police Officers Memorial at the northeast corner of the State Library and Courts Building. The addition would consist of a low, U-shaped wall placed directly behind the	NOE

<u>Documents Received on Tuesday, March 08, 2005</u>			
	<p>existing memorial at the edge of the sidewalk. The addition would be shaped in a curve to match the existing edge of the sidewalk; it would be about 70 feet long and 26 inches high. Two low planters would also be included in the addition.</p> <p>The purpose of the new addition is to provide additional space to memorialize the names of slain police officers since there is a shortage of space on the original memorial.</p>		
2005038096	<p>Howard Harris Motorcycle Playground (HHMCPG) Modifications at Hollister Hills State Vehicular Recreation Area (SVRA) Parks and Recreation, Department of Hollister--San Benito</p> <p>The purpose of this project is to improve drainage, reduce soil loss, improve/repair existing ramadas, and rearrange existing facilities to provide for safer training facilities for ATV and CALPAL classes. To improve the drainage and reduce soil loss from the parking area, the ground will be leveled, sloped to drain into an existing drainage ditch, and compacted. Road base will then be added to the top layer. This will reduce the formation of mud during rain events and will allow water to drain quickly without carrying sediment. An existing wash rack, which is contributing to the formation of mud and increasing sediment transportation, will be removed from the area.</p> <p>In order to level the parking area and slope appropriately, all ramadas and picnic tables will be temporarily removed. After the parking area has been repaired, ramadas will be replaced (with picnic tables) along the perimeter of the parking area. By placing the ramadas along the perimeter, it will be easier to maintain the parking area and prevent future sediment transportation. Ramadas which are in need of repair/replacement will be replaced with ADA sized ramadas.</p> <p>In order to provide safer training facilities for ATV and CALPAL classes, the Vintage Track and Beginner Track will be modified. The Beginner Track will be moved to the NW corner of the Vintage Track and fenced separate from the Vintage Track. The original location of Beginner Track will be used to provide an ATV Training Range separate from the CALPAL Training Range. The area will be reshaped to comply with required dimensions for an approved MSF training range. This will place the ATV Training Range next to the CALPAL Training Range, thus localizing the training facilities for ease of use and safer congregation of students. Within the Vintage Track facility, the track layout will be modified to accommodate the new location of the Beginner Track and reshaping of ATV Training Range. No new area will be used. All modifications and repairs will occur within the greater HHMCPG facility. As needed new fencing will be installed and old fencing will be replaced/repared. Fencing will be either non-climb wire mess or wooden split rail. The existing parking area will not be expanded.</p> <p>When the Beginner Track is reshaped for the ATV Training Range, three walnut trees and an elderberry tree will be removed. Seed from the elderberry tree will be collected before it is removed and grown at a local nursery for replanting within the Park.</p> <p>Ground to be disturbed is comprised mainly of fill, so no archaeological artifacts should be encountered. If any artifacts are encountered, work will stop and an archaeologist will be notified. Additionally, the modifications being made should reduce dust. The parking area, Beginner Track and ATV Training Range will be more accessible for dust suppression via water truck.</p>	NOE

2005031034	Rancho Bernardo Industrial Park Lot 11 San Diego, City of San Diego--San Diego Tentative Map (TM No. 2259), Site Development Permit (SDP No. 2260), and Planned Development Permit (PDP No. 196193) to develop 3- to 4-story buildings, a four-level parking structure, common surface parking areas, two open space easement areas and subdivide approximately 26.99-acres into seven lots. In addition, to mitigate for unavoidable impacts to wetland and upland habitats associated with the development of Rancho Bernardo Industrial Lot 11, the project would include the implementation of wetland and upland habitat creation, restoration, and revegetation to be completed within a 10.17-acre off-site mitigation parcel.	MND	04/07/2005
2005031035	Stadium Park Residential Project Anaheim, City of Anaheim--Orange The proposed project will include the demolition of an existing industrial warehouse facility. Lot 1 will include a 320-unit apartment community and Lot 2 and Lot 3 will include four condominium buildings (total of 451 units). Parking structures with two and three parking levels will be constructed below the residential units on each lot. The proposed project will provide 1,490 parking spaces (Code requires 1,463). Access to the proposed parking structures will be provided via the proposed connector streets via Katella Avenue and the proposed internal street. Recreational amenities, conference rooms and a leasing office will be located within each complex. Lot 4 will include an approximately 0.78-acre public park and will have a central sporting green for active recreation and perimeter passive areas for picnic and other recreational uses. Lot 5 would be a private street. Grading for the project will generate approximately 124,563 cy of cut, which will be disposed of at a legal disposal site approved for this type of material. The maximum depth of excavation is anticipated to be 23 feet below ground surface for Lot 2, 12 feet for Lots 1 and 3, and 2 feet for Lot 4. Project construction is anticipated to begin in June 2006 and completed by February 2009. The project will be constructed in six phases over an approximate three-year construction schedule.	MND	04/07/2005
2005032046	Chevron Station - Ft. Jones Road Yreka, City of Yreka--Siskiyou The construction, establishment and operation of a service station, mini-mart, and fast food restaurant with a drive-up window.	MND	04/07/2005

	entitlements. Of this 26.7 million sf, 6.7 million represents full buildout of the project area under the existing FAR cap policy and 20 million sf would be the net amount of additional development potential created through the proposed changes to current City policies. This amount of total new development would allow for approx. 83,300 new employees. In addition, up to 32,000 new dwelling units would be allowed in Rincon at minimum densities of 20, 55, or 90 dwelling units per acre depending on their location. Of these 32,000 new units, 7,300 new residential units could be built on properties with existing residential General Plan designations and the remaining 24,700 new residential units could be built on properties within the housing overlay areas proposed by this project or in a mixed use configuration within the Industrial Core Area itself. This would allow a population increase of approx. 56,640 persons.		
2005031039	WITHDRAWN -- Santa Ynez Valley Community Plan Santa Barbara County --Santa Barbara The Santa Ynez Valley was last reviewed for appropriate land use and zoning designations as part of the County-Wide update to the Comprehensive Plan that was undertaken in 1980-81. Since that time, considerable growth has occurred and new planning issues and development trends have emerged. This has raised concerns regarding the changing character of the Valley. Concerns include: preserving the viability of agriculture amidst continuing subdivision of larger working agricultural parcels into ranchettes, increasing traffic, insufficient infrastructure to accommodate new growth and the impact of the expanding tourism industry. These issues, coupled with the lack of Valley-specific policies and development standards within the 1980-81 Comprehensive Plan, have necessitated the development of a focused planning document for the region. 2003121036	<p>Metropolitan Transportation Authority West Los Angeles Transportation Facility and Sunset Avenue Project Los Angeles County Metropolitan Transportation Authority Los Angeles, City of--Los Angeles West Los Angeles Transportation Facility The proposed project consists of a state-of-the-art transportation facility from which to operate a fleet of up to 175 Compressed Natural Gas (CNG) powered buses and to provide improved public transit service in the central and western areas of Los Angeles County. Relocation of existing operations at Division 6 in Venice to this location would allow Metro to expand service from a more centralized location in response to growing ridership. Development of the transportation facility on the 4.66-acre site would provide Metro with expanded maintenance and administrative facilities, CNG fueling facilities, and bus and employee parking. The project would include 53,120 SF in a primary administrative/maintenance building and approximately 18,800 SF of auxiliary facilities.</p> <p>Sunset Avenue Project The proposed project would replace the vacated Division 6 operation with a mix of residential and commercial uses supported by two levels of subterranean parking. Residential uses would occupy several individual structures that would each contain a varying number of dwelling units. Open areas between the individual structures would allow for communal walkways, common space for recreation or garden areas, water features, and landscaping. A maximum of 225 units would be offered, with a total residential floor area of approximately 270,000 SF. Residential structures that face Main Street and Pacific Avenue are proposed with building heights that would not exceed 35 feet, while structures in the center of the site and those facing Sunset Avenue and Thornton Place are proposed to be approximately 45 to 56 feet in height. Commercial uses include approximately 10,000 SF of floor area in a ground floor setting facing Main Street. Commercial and retail space would be occupied by cafe, retail, and health club uses. This site is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65912.5 due to detected contaminants from previous use of the property. However, a health risk assessment has determined that these contaminants do not pose a risk to human health.</p>	FIN	
2005031049	<p>Toyota of Huntington Beach; Conditional Use Permit No. 04-31 Huntington Beach, City of Huntington Beach--Orange Construction of a new vehicle sales and service center consisting of 39,500 sf of building floor area, including sales/office/showroom (15,424 sf), storage (2,975 sf), and service space (21,100 sf). The service area would accommodate 38 fully-enclosed bays. The proposed building is two stories, 32 feet-six inches tall. In addition, the proposed project includes a 162,650 sf multi-level parking structure varying in height between 18 ft. and 51 feet-six inches (including a 3 foot-six inch tall parapet wall), a service canopy and grade level parking surfaces. Approximately 15% of the site would be landscaped.</p>	MND	04/11/2005

2005031059	<p>Application to Appropriate Water No. 30893 State Water Resources Control Board, Division of Water Rights --Los Angeles</p> <p>The Mountain High Ski area has historically used water from Swarthout Creek to produce snow during the winter ski season and for fire protection purposes all the other times of the year. The diversion works consist of wells adjacent to the stream course that have been shown to draw water from the subterranean portion of Swarthout Creek. The water can be pumped to two reservoirs (92.9 and 41.5 sf capacity) at the summit of the ski area, or can be directly diverted to the snow making equipment without going through the reservoirs. However, the overall efficiency of the system is improved by using the reservoirs to pressurize the snow waking mechanisms. The applicant seeks an appropriative water right so that the reservoirs will not have to be filled and drained every thirty days (regulatory storage for riparian diversions, as defined by the Division of Water Rights), to maximize system efficiency, and to provide for water storage for fire protection purposes. All diversion and distribution facilities are in place; no construction will take place as a result of the project.</p>	Neg	04/12/2005

	DTSC is also approving a Removal Action Workplace for a 10.49 acre portion of the Facility proposed to be sold to the City of San Jose. This portion of the Facility is identified as Parcel 0-6 and is located on the eastern side of the Facility. Based on samples collected on Parcel 0-6, DTSC has determined that corrective action is required for arsenic and asbestos. The Removal Action Workplan proposes removal of approximately 3,000 cubic yards of soil contaminated with arsenic and 2,500 cubic yards of fill material containing naturally occurring asbestos for off-site disposal. The amount of material will require 300 to 350 truckloads. The Removal Action will require approximately 6 weeks of field activities.		
2005034003	Addition/Alteration, New Construction - Roseville Readiness Center Army National Guard, California Roseville--Placer The proposed action includes three separate components: 1) the Alteration of a single unit Readiness Center (also known as the armory), constructed in 1963; 2) an engineered building to accommodate existing units and requirements and 3) outside supporting facilities/infrastructure. 2005012058	Recycled Water Project Delta Diablo Sanitation District Pittsburg--Contra Costa The DDSD Recycled Water facility proposes to expand its water reuse system. Under the Recycled Water Project, DDSD would extend the recycled water pipeline, using existing pipeline and constructing new pipeline, to establish recycled water service to the Delta View Golf Course and for use as landscape irrigation at schools, parks, medians, and other green spaces along the alignment. The facilities include a total of 14,000 feet of underground pipeline, a pumping station and smaller booster station, and an above ground storage tank.	NOD	
2005039027	Elk Grove General Safety Element Amendment Elk Grove, City of Elk Grove--Sacramento The proposed amendment to the Safety Element involves changing policy SA-3 of the Elk Grove General Plan.	NOD	
2005038114	Prairie City State Vehicular Recreation Area (SVRA) Soil/Subsurface Survey Parks and Recreation, Department of Folsom--Sacramento This project includes the installation of seven ground water monitor wells, collection of surface and subsurface boring hole soil samples and collection of subsurface vapors. All project components are required to provide updated data and to correct any previous survey errors. The seven monitor wells will be installed to the level of subsurface water using a drilling rig and will take approx. one week. These wells will remain permanently for continued collection and sampling of ground water. Collection of shallow soil samples (23) will entail use of hand tools to excavate up to three feet of soil in small dig sites. The excavation areas will be backfilled and no permanent installation will remain. Collection of soil and aggregate samples from approx. 20 boring holes will entail use of a truck mounted boring drill (12" and 36" diameter) and will take approx. two days to complete each hole. The boring holes will be backfilled and no permanent installation will remain. Sampling of subsurface vapor will entail use of a narrow ground sampling rod to be inserted at 20 locations. No permanent installation will remain.	NOE	
2005038115	Prairie City State Vehicular Recreation Area (SVRA) Hangtown Facility Expansion Parks and Recreation, Department of Folsom--Sacramento This project includes the expansion and improvement of the Hangtown motor cross staging area (Pit) and adjacent parking area to comply with the American Motorcycle Association requirement of 10 acres for motor cross event staging. All existing project elements will occur within the existing Hangtown track and parking facilities.	NOE

	<p>The expansion will include the removal and replacement of fencing, excavation, and grading of existing staging and parking areas, installation of two 10' x 20' metal tunnels for pedestrian passage, realignment of underground utility lines, installation of a 6-8 stall restroom with leach field, planting of trees, and placement of approx. 200 cy of aggregate road base. The expansion will encompass approx. 3 acres of existing parking which will be regraded to allow for larger vehicle access. The new fence line will be installed around the expanded parking area and reconnected to the existing Pit fence. The existing Pit area will be graded and terraced using heavy equipment to lessen the slope grade for increased parking, improved pedestrian safety, and ADA compliance. The entrance and Pit roads will be redesigned to improve vehicle access and traffic. The existing underground utility lines will be rerouted or reinforced to ensure protection of existing utilities scoring tower and new restroom.</p>		
2005038118	<p>Administrative Office of the Courts Infill Project General Services, Department of San Francisco--San Francisco</p> <p>The proposed project would renovate approx. 30,000 gsf of the 8th floor of the San Francisco Civic Center, a State-owned facility, to provide additional office space needed for the Administrative Office of the Courts (AOC). AOC currently occupies space on the 3rd, 5th, 6th, and 7th floors of the SFCC. The project would provide space for approximately 120 AOC employees. The project would make minor interior improvements including reconfiguration of walls and modular systems furniture, modification of infrastructure utilities, and telecom/data and security systems. The project involves a negligible expansion of current use.</p>	NOE	
2005038119	<p>Department of Industrial Relations Restack/Infill - San Francisco Civic Center Project General Services, Department of San Francisco--San Francisco</p> <p>The proposed project would renovate approx. 36,000 gsf of the 9th and 10th floors of the San Francisco Civic Center, a State-owned facility. The project would make minor interior improvements including reconfiguration of walls and modular systems furniture, modification of infrastructure utilities, and telecom/data and security systems. The project is needed to provide for the relocation of approx. 163 Department of Industrial Relations employees from the 8th floor to the 9th floors of the SFCC. The project involves a negligible expansion of current use.</p>	NOE	
2005038120	<p>Department of Industrial Relations Relocation/Backfill - Elihu Harris Building, Oakland Project General Services, Department of Oakland--Alameda</p> <p>The proposed project would renovate approx. 63,000 gsf of the 16th, 17th, 18th, and 19th floors of the Elihu Harris Building, a State-owned facility, in Oakland. The project would make minor interior improvements including reconfiguration of walls and modular systems furniture, modification of infrastructure utilities, and telecom/data and security systems. The project is needed to provide for the relocation of approx. 256 Department of Industrial Relations employees from the 8th floor of the San Francisco Civic Center to the 16th, 17th, 18th, and 19th floors of Elihu Harris Building. The new location is well served by public transit. The project involves a negligible expansion of current use.</p>	NOE

2005038121	<p>Approval of the Moore Printed Circuits Corrective Measures Implementation Plan Toxic Substances Control, Office of Military Facilities San Diego--San Diego</p> <p>The Corrective Measures Implementation Plan addresses potential health risk resulting from release of volatile organic compounds and metals during past printed circuit board manufacturing operations. The proposed remedy is a land use covenant to limit the property to industrial use.</p> <p>Sampling was conducted to determine the levels and limits of residual contamination. The residual concentrations of copper (489 mg/kg), lead (42.1 mg/kg), arsenic (7.3 mg/kg) are directly associated with the former subsurface wastewater pipes and a sump. All other metals' concentrations detected were below background soil levels. Residual solvent concentrations in soil gas were also found. No cyanide residue was detected in the soil.</p> <p>A Human Health Risk Assessment was conducted to determine whether human health or the environment is at risk from the remaining contamination. Residual solvent concentrations in soil gas are above residual exposure levels, for indoor air contaminant, but are acceptable for continued industrial/commercial use of the property. Although residual metals' concentrations are above background soil levels, they will not pose a substantial risk to continued industrial/commercial use of the property. There is no risk to groundwater or neighboring properties from the residual contamination.</p> <p>The deed restriction will limit the property to industrial use. Specifically, this will prohibit use of the property as a residence, hospital, school for persons under the age of 21, or daycare center to avoid an unacceptable cancer risk.</p>	NOE

<u>Documents Received on Monday, March 14, 2005</u>			
2005038175	<p>Archaeological Investigation - Shasta Ruins Stabilization Parks and Recreation, Department of --Shasta</p> <p>Conduct archaeological test to determine historic design of brick structures and efficacy of drain system at Shasta SHP Southside Ruins, to assist the design team on the proposed Shasta SHP Ruins Stabilization Project. Although the tops of drain arches are visible in the front and rear walls of some of the structures, many details are obscured by the soil within the buildings. Recent geotechnical and historical studies revealed relatively recent fill, including brick fragments, at depths ranging from 3 feet to more than 10 feet deep around the buildings. DPR archaeologists propose excavation of small test units and narrow trenches within or just outside the brick walls of extant structures with the following goals:</p> <ul style="list-style-type: none"> - Attempt to discover/describe the historic drain systems - Characterize the contents and timing of the fill within the structures - Expose and describe the walls and footings obscured by the fill. <p>The rear wall at Lot 12, the rear side wall of Lot 14, and the front walls of Lots 15 and 19 all exhibit construction anomalies that may be drain structures. These areas will be the focus of some of the test pits designed to observe the historic drain system design. In addition, a small number of units will be intuitively placed beside the front or side walls in Lots 9, 11, 16, and 20 to ascertain details of wall and foundation construction.</p>	NOE	
2005038176	<p>Sewer System Improvements at Calaveras Big Trees State Park Parks and Recreation, Department of --Calaveras</p> <p>Repair and improve wastewater system at Calaveras Big Trees State Park, retaining existing sewer infrastructure of main trunk-line, 10,000 gal. septic tank, lift/pump station, pumps, distribution boxes and spray fields. Install one additional wastewater holding/dosing tank and construct an additional 35,000 sf leach field with monitoring wells incorporated into leaching trenches, approx. 600' uphill, northwest of the existing leach field. Situate new holding/dosing tank and leach field approx. 75 feet east of the Park's fenced western boundary. Extend force main from lift/pump station, 500 feet northwest to the new holding/dosing tank, to gravity feed effluent to the new leach field and/or existing spray field. Lower the existing pump inlet 6" above the bottom of tank. Add high water alarm/telemetry to lift/pump station. Replace existing spray heads at the spray field as needed.</p> <p>Repair existing main trunk-line by slip-lining the existing 8" trunk-line between the manhole east of Highway 4 and the lift/pump station situated approx. 1000' to the west. Retain existing leach field for emergency use only. The purpose of this project is to expand and improve the existing deficient sewage treatment system, in order to avoid potential health and safety issues due to wastewater effluent seeping up through the ground surface. Required trenching will be approx. 2 feet in width by 2-3 feet in depth. All ground disturbance and trenching shall be backfilled and compacted to the original grade elevation upon installation of drainage rock, piping and geotextile fabric, etc. as required.</p>	NOE	
2005038177	<p>Frank Valley Accessibility Retrofit Parks and Recreation, Department of --Marin</p> <p>Perform improvements to meet ADA standards at Frank Valley Horse Camp (Redwood Creek Horse Camp) at Mount Tamalpais State Park. Work includes:</p> <ul style="list-style-type: none"> - Remove existing pit toilet and leaking holding tank. Replace with a new prefabricated CTX vault toilet and holding tank. 	NOE

2005031067	Bubba Gump Shrimp Co. Deck Expansion Monterey, City of Monterey--Monterey The project proposes an approximate 1,480 sf deck addition at the side of the Bubba Gump Shrimp Co. The deck is proposed for outside dining (approx. 1,200 sf) and coastal access (approx. 360 sf). As proposed, the deck will be designed and constructed to span over the water and rocky intertidal edge of Monterey Bay and connect to the adjacent structure at 700 Cannery Row. No new piers, footings or other support structures are to be constructed in the intertidal area below the deck. The coastal access is 6-foot wide and it is intended to allow the public to walk along side the new deck to the end of the deck for views to the bay. The deck includes 8-foot tall glass windscreens.	Neg	04/13/2005
2005031069	New Elementary School #18 Rialto Unified School District Rialto--San Bernardino The District proposes to develop and operate an elementary school, serving 1,206 students, grades K through 5, at the proposed project site at the northeast corner of Rialto and Larch Avenues. 2004012111	Hood Mountain Regional Park Expansion Project Sonoma County Regional Parks --Sonoma Construction of approx. 0.5 mile of the Bay Area Ridge Trail.	NOD	
2005038178	Tolay Lake Ranch Acquisition State Coastal Conservancy Petaluma--Sonoma Acquisition of this 1,737 acre Tolay Lake Ranch for the protection and restoration of natural resources and to provide public access.	NOE	
2005038179	Annexation of Mc Geough and Soldat Parcels into Lee Lake Water District and Minor Sphere of Influence Update-Categorical Exemption Lee Lake Water District Unincorporated--Riverside The project consists of the annexation of two, 5-acre parcels into the Lee Lake Water District service area for the purpose of providing potable water service. It is proposed that a single family dwelling will be constructed on each parcel.	NOE	
2005038180	Etiwanda Avenue Pavement Rehabilitation Ontario, City of Ontario--San Bernardino This project consists of the rehabilitation of the existing asphalt pavement, placement of ARHM overlay, ADA ramp installation, and minor gutter replacement. This project will provide for improved rideability, prevent further deterioration, and extend the useful lifespan of the existing pavement surface.	NOE	
2005038181	Sewer Improvements Project Ontario, City of Ontario--San Bernardino This project consists of replacing and providing relief of existing sanitary sewers. The existing sewers are currently operating over their capacity. The replacement/relief of the existing sewers will provide the necessary capacity to contain and convey the existing sewage flows to treatment plants.	NOE	
2005038182	Addition to Baldy Mesa Elementary School Snowline Joint Unified School District --San Bernardino The purpose of this action is to add classrooms to Baldy Mesa Elementary School. The project will house students to accommodate enrollment growth and will enhance educational opportunities for students.	NOE	
2005038183	Addition to Chaparral Continuation High School Snowline Joint Unified School District --San Bernardino The purpose of this action is to add classrooms to Chaparral Continuation High School. The project will house students to accommodate enrollment growth and will enhance educational opportunities for students.	NOE	
2005038184	Addition to Serrano High School Snowline Joint Unified School District --San Bernardino The purpose of this action is to add classrooms and support facilities to Serrano High School. The project will accommodate enrollment growth and will enhance educational opportunities for students.	NOE

<u>Documents Received on Tuesday, March 15, 2005</u>			
2005038185	<p>Poison Oak Control (04/05-CD-22) Parks and Recreation, Department of --San Diego</p> <p>The project involves the removal of poison oak within portions of four trail corridors within Cuyamaca Rancho State Park. The encroachment of poison oak into trail corridors can cause health problems for both the visiting public and park trail maintenance staff. In addition, park visitors often travel off-trail to avoid contact with poison oak, resulting in damage to surrounding vegetation and potential increased erosion. Poison oak will be removed using an approved herbicide applied only in the trail corridor. Herbicide will be applied by an authorized herbicide applicator.</p>	NOE	
2005038187	<p>Salt Creek Trenching for Earthquake Study (04/05-CD-21) Parks and Recreation, Department of --Imperial</p> <p>Project consists of conducting a geological study to extend the known history of the southern San Andreas fault's past behavior. The project will be conducted in two phases, both within the Salt Creek drainage. Phase 1 involves the excavation of a single 120' logn by 10-15' deep (fault perpendicular) trench to evaluate subsurface geological deposits for earthquake study. Phase 2 involves the excavation of two 200-250' long by 10-15' deep fault-parallel trenches, and a number of approx. 50' long fault perpendicular trenches, in order to trace offset beds across the fault. Sediment fencing, or other sediment control measures, will be employed to prevent any flow of sediment from the excavation sites into Salt Creek. All trenches will be refilled and landscaped when the study is complete. A State Parks archaeologist and paleontologist will be present during all excavations to assess and preserve any significant cultural or fossil resources unearthed.</p>	NOE	
2005038188	<p>Heron Rookery ADA Pathway Parks and Recreation, Department of --San Luis Obispo</p> <p>The project proposes to abandon an existing walkway, install a five foot wide ADA pathway, and construct an ADA viewing area at the Heron Rookery Natural Preserve. The new path will be surfaced with decomposed granite or 1/4 minus aggregate (fine-grained aggregate less than 1/4 inch diameter with a high binding property) terminating at a five foot by 28 foot observation area. Slope will not exceed 2 percent. A new two-sided ADA compatible interpretive shelter will be located next to the new path. The existing parking lot will be capped and leveled with Class 2 base, and an ADA parking area will be delineated. Work will be carried out be Dept. staff and state park volunteers.</p>	NOE	
2005038189	<p>Student Services/Admin Replacement Building California State University, Hayward Hayward--Alameda</p> <p>This project will replace the upper 8 floors of the existing Warren Hall Building on campus, as part of a rescoping approach to address the seismic deficiencies and asbestos risks associated with Warren Hall. Once the replacement facility is in place, the existing upper 8 floors of Warren Hall will be demolished. It will create no new net assignable sf on campus.</p>	NOE

2005038190	Nye Ranch Project Fish & Game #5 --Ventura The operator proposes to alter the streambed to reclaim approx. 1 acre of property on the west bank of the Ventura River lost during high flows of the river in early January, 2005. SAA# 1600-2005-0131-R5	NOE	
2005038211	Lake Perris SRA - Separate Irrigation and Potable Water Systems (0405-IE-6400) Parks and Recreation, Department of --Riverside Construct a separate water system for delivery of non-potable water for irrigation and potable water for potable systems. The new system will be constructed to minimally treat raw lake water and divert the water to a new trunk irrigation line with lateral connections to the existing irrigation network. Potable water will be purchased from the Eastern Municipal Water District for all potable systems as well as some of the smaller irrigation zones.	NOE	
2005038212	Archaeological Testing Parks and Recreation, Department of --Monterey Perform archaeological testing and evaluation in Point Lobos State Reserve. To maximize data return with a minimum of excavation, site testing will consists of removing a 25 X 25 cm column from some deposits; for other sites, single units between 25 X 25 cm and 1 X1 meter will be excavated with a 25 X 25 cm column removed from a sidewall of each unit.
